Professor of Medicine	George Washington University

Privileges

Piedmont Healthcare, Dekalb Medical Center, George Washington University Hospital

I am honored to have been nominated for this position and would like to thank Dr. Traron Moore for his support and confidence in considering me for Member at Large. I have been a long-standing member of Alpha Phi Alpha Fraternity, Inc. for over 18 years, and as much as I have been a good steward of my own personal and professional development, I am deeply biased towards the development of this great organization, especially this local chapter, Nu Mu Lambda. I have been actively involved in Nu Mu Lambda for over 4 years, and like any organization, I will admit that as imperfect as we as a chapter may be, the foundation of this organization gets better each year with strong, motivated and dedicated leaders who are willing to put not only the agenda of this organization first, but to also advance our leadership role and presence in our local community.

The advancement of leadership requires not only man power and finances, but the two things that Nu Mu Lambda has represented well are its foundation in reputation and a commitment to the greater good. As a strong supporter of Nu Mu Lambda's agenda, my vision is to work closer with the leadership of this chapter to ensure that we continue to be good stewards of our budget, talent and time.

I believe Dr. Moore entered my name in nomination because we both share a passion for transparency, while focusing on effective means on how to promote our shared core values. My promise is to make every attempt to live up to the confidence of the brotherhood.

Undoubtedly, I am a leader who's not only interested in the process, but equally biased towards good results. I am firm believer that my actions will speaker louder than my voice can ever afford me. It is on this basis that I ask you to vote for me for Member at Large.
